## Product Designer

Product Designer with over 10 years of experience delivering scalable digital products, high-converting enterprise workflows, and component-driven design systems. Specialist in bridging Product Management, Design, and Engineering through data-driven discovery, behavioural analytics, and modern AI-assisted prototyping. Proven track record of scaling platforms from 500 to 3,000+ active advisers, increasing core quoting frequency by 2.5x, and cutting developer feature delivery times from 1–2 weeks down to 2–3 days.

## SKILLS

Product Strategy, System Architecture, Design Systems, UX Research, UI Implementation, Prototyping, Figma, HTML / CSS / Tailwind, Token Architecture, Cursor IDE / MCP, Integration, Azure DevOps, Microsoft Clarity, FinTech, Prop, Tech, E-commerce, SaaS

## EDUCATION

### De Montfort University

BA (Hons) Graphic Design **(2:1)**

2009 – 2012

### Suffolk College

Art Foundation **(Merit)**

## Stonebridge - Senior Design Engineer / Product Lead

### 2018 - PRESENT

#### Key Responsibilities

Sole Product Design Lead owning end-to-end design, token architecture, and front-end execution for the Revolution fintech platform. Bridged Product, Compliance, and Engineering by translating complex enterprise workflows into scalable C# interfaces and production-ready code.

#### Key Achievements

**AI Compliance Optimisation (+40% Speed):** Redesigned an 83-checkpoint system for 160+ reviewers. Serialised complex decision trees into JSON state machines and engineered an in-dashboard AI checker, cutting processing time by 40%.

**Self-Serve MI Analytics:** Architected a self-serve reporting engine for 400+ firms, eliminating a major bottleneck where manual developer queries previously took up to a week to deliver.

**Technical UX Guardrails:** Engineered a 2-stage reporting protocol (runtime filtering and preview limits) that decoupled queries from the live database, eliminating 100% CPU spikes and load-balancing failures.

**Platform Migration (60% Click Reduction):** Overhauled the Revolution Fact Find during a VB to C# migration. Consolidated fragmented flows into a high-density "Cockpit Hub", reducing click friction by 60% for 1,300+ active users.

**Telemetry & Auditing:** Instrumented Microsoft Clarity heatmaps across staging environments to eliminate interface bloat, using empirical data to optimise for task completion over opinions.

**Figma-to-Code Velocity:** Built token-driven design systems (:root variables, responsive scaffolds) integrated with Cursor IDE and MCP, cutting developer delivery from 1–2 weeks down to 2–3 days with zero visual drift.

## **MVAD (Murphy Varley) - Graphic & UI Designer**

**2018**

### **Key Responsibilities**

Delivered traditional graphic design, multi-channel marketing collateral, and digital campaign assets for major automotive dealerships, Wilkin & Sons (Tiptree), and corporate accounts. Produced print and digital materials ranging from high-impact billboards and event posters to web banner suites and Flash/HTML5 animated advertising.

## **FSE Design - Web & Graphic Designer (Interim Team Lead)**

**2017 – 2018**

### **Key Responsibilities**

Led web and digital design output across educational sector client accounts. Stepped up as Interim Design Team Lead for 4 months during senior medical leave, managing studio production capacity, developer handoffs, and team output to hit strict project deadlines.

### **Key Achievements**

**Interim Studio Leadership:** Successfully managed the design team and studio workload for 4 months, maintaining high design velocity and operational continuity across all live web projects.

**Modernised Digital Workflows:** Replaced slow, legacy InDesign web mockup processes with Adobe XD, establishing modern component-based UI workflows that accelerated design turnaround times and streamlined developer handoffs.

## **Bluestep Solutions - Digital & Graphic Designer**

**2014 – 2017**

### **Key Responsibilities**

Joined as a Junior Designer and self-taught front-end web development (WordPress, HTML, CSS) to pioneer and build the agency's in-house digital production unit from scratch. Expanded Bluestep from a traditional print/merchandise supplier into a full-service digital agency, enabling the business to offer custom web design and front-end development alongside existing merchandise campaigns for major accounts (such as the NHS and Red Cross).

### **Key Achievements**

**Founding the Digital Business Unit:** Built and launched the agency's digital service offering independently, driving agency growth from 5 employees to 30+ staff during tenure.

**New Revenue & Client Acquisition:** Enabled the agency to pitch and win web design projects for a whole new segment of smaller charities and private businesses by introducing in-house digital capabilities.

**Team & Infrastructure Expansion:** Scaled digital client demand to the point of hiring dedicated full-stack developers and building out a structured, multidisciplinary web production team.
